Y.; D. A. Nebls, Monroe, Mich ; W. Clark, Monroe, Mich.; Henry Ledyard, Detroit; Henry P. Baldwin, Detroit. This is a connection much needed by the Sou hern Michigan Road, as it will give them a share of the busines which comes to Detroit by the Great Western (Canada) Road, and which has heretofore been monopolized by the Michigan Central. The rotte is a feasible one, and the distance from Datroit to Chicago rather less than by the Northern route. The Directors of the Michigan Southern individually are reported to have subscribed \$300,000 to the stock. The completion of this road will be likely to inaugurate a more active competition between the Southern

and Central Roads than has heretofore existed. We hear of 1,000 shares I-linois Central stock bought yesterday for foreign account, on telegraphic orders from Helifax. The price paid was above the current market price at the time. We think there were also telegraphic orders for Illinois Central Bonds. The receipts of the R ad for November were about \$187,000.

Mr. Watts Sherman of the house of Duncan, Sherman & Co., left town to-day for an extensive tour of observation through the southern portions of the country and Havara. His movements may embrace San Francisco, where the business relations of the house, managed there by Messrs, Alsop & Co , are as-

suming features of great importance.

In the Money market there is no new feature. There was perhaps rather more activity in call loans to day,

but the supply was abundant.

In regard to the jobbing business of the city The In dependent says:

In regard to the jobbing business of the city The Independent says:

"Arrangements are now being made on a very extensive scale in New-York for the Spring trade. The great prosperity which has attended the effects of our business men the past year has induced the organization of a large number of new firms, to commence operations on the lat of January. Unless prevented by a tight Money market, business will therefore be largely extented the coming year. The country, it is generally conceded, was never in a sounder condition than at present. Old indebtedness has been canceled, and her financial condition is far better tran any other section of the country. The merchants of Illinois are now as good and as independent as the merchants of Massachusetts. Far off Wisconsin—the very garden of the West—presents a more inviting field to our New-York merchants than any State in New-England. Inciana is as sound as a nut, and in a condition to buy more merchandise and do more business than at any former period. Ohio and Michigan of course are flourishing in commercial affairs. With bright prospects, therefore, as far as our own country is concerned, do we lock forward. The business of New-York the coming yeer will be immense."

A telegraphic dispatch from a leading house in St. Louis to its correspondent here, requests them to send

Louis to its correspondent here, requests them to send no more gold, which would indicate that the drain in that direction was suspended, for the present at least. This drain has been large for the last two months, not less than a million of dollars, of which one commercial house here has sent nearly half a million. The movement of specie between this city and Beston is turning in our favor. We hear that \$50,000 are going to Sa-

vannah by the steamer.

There is more movement in coffee and sugar, and the tendency of the market is upward, with a speculative movement. Cotton is steady, but buyers and sellers disagree. Breadstuffs are rather firmer, flour showing 61c. advance Among the sa'es of corn was one of 50,000 bush. Southern at 90c. for January. Pork is somewhat excited, and has an upward tend-

"No material variation has taken place in the position of the money market. In the early part of the week the demand at the discount-houses for accommodation was heavy and high rates were paid on the best bills. The calls on the Bank of England were also large. The engagements of the 4th of the month past over satiactorily, and it is understood that the number of acceptances un provided for were fewer than usual. During the last few days there has been less tightness, and there are expectations that the Bank of England will stortly reduce the rates upon bids between sixty and ninety-five days, although no change is likely for some time in the minimum 6 \$\psi\$ cent of the first class paper. In the Stock Exchange Money is worth 5\frac{1}{2}\$ to 6 \$\psi\$ cent on Government Securities. Mesers. D. Bel, Son & Co. report that during the week past a decided improvement has taken place in the market for American Securities. There has been some inquiry for State stocks, but the transactions in them have not been to an extent to affect prices; while for the various raiwoad bonds an active demand has prevailed, with considerable business at improved quotations. The New-York and E-ie and I linois Central Bonds still attract chief attention, and exhibit the most material advance in prices.

During ten or twelve days past an immense amount of produce has arrived in the city from the Eric Canal, and sales are rather slow and but little change in the prices. In one or two weeks the rates of nearly all kinds of produce will advance. The market is abundantly supplied with Meats and Poultry. Some very fine-looking carcasses of Mutton, sent in ready dressed, are selling at 5 @ 6c.; and Beef from 7 @ 9c.

The best quality of Poultry is still held at high figures, with a good supply and demand. Some ir responsible dealers or speculators are doing a thriving business upon the sale of "Manufactured Poultry." Very frequently large lots of Poultry arrive in market damaged by detention and heating. When unpacked it is sometimes almost black and slimy, and only fit to be dumped into the river. This Poultry is bought up by persons on the lookout sometimes as low as one cent P fb. It is then "manufactured over" by being tosked in alum water, which restores it to the natural color and removes the unpleasant odor. It is then offered for sale at a few cents less per lb than good Ponitry can be purchased, and finds ready customers in some boarding-house landsadies, and others in Baring Brothers & Co.'s Circular.

To Mariners.

To Mariners.

Important to Mariners is the Australian Teadle.—The owners of the Austral. (Mestr. Plishton & Wilson of Liverpeol.) have received the log of that vessel on her recent vesses to Melbourne, from which we make the following important extract:

"J.ly 25 Wind N. N. E. and N. Midnight, very thick west er. At a m. the fog disposed for a few minus of and it was to the most read it we have read to the wester clearly a titude were and we discovered the land (one of Crosets' slands) right sheet it wo hours, and the weather clearly as titude were and kept by the wind, expecting to reach our to the nuthward. At 8. m. the weather sain became very thick and at the same anomal we discovered the land, sur, ounted by very high breakers, extening to ut on the weather how, and no extremity to leavest, owing to the excessive thekness of the weather. By the promptime with which the ship obeyed her he m, and the sistance rendered by the passences, and or the blessing of Almighty God, the ship was aswed from utter destruction said the sistance tendered by the passences, and are the island, and by a chart of the chief mes, used on the last passage out we wan abreat of the chief mes, used on the last passage out we wan abreat of the saw have oner, with additions up to the places the group in about lat to the E. and how 25 M. Significant on hance of proving any option, owing to the extreme ickness of its weather. I have, however, taken the procession to chance of proving any option, owing to the extreme ickness of its weather. I have, however, taken the procession observed at 4 a. m.

revits my home to my fire other, Mr. John White, for the promptitude and declaim he displayed when the land was first observed at 4 a. m.

"N. BANNATYNE, Captain Arabian, (since dead.)"
The appearance of the above letter in the Underwriters' Rich has caused numerous references to be made to be hooked by shippoweers whose captains have made very see in tast quarter. In one of these the log of Capt. Hickman of the Athelates, on his voyage from this port to Adeiside, in 1833, the following remarks appears.

"Nov. 12 1823. Lat 46 45 3, lon 36 80 E., log account, 6 30 a.m. On the clouds lifting were surplisted to find one of the Circuit is an extended to the course of the same provided and the course we have been storing above E. We immediately wore ship, and house up on the set beard on S. W., bit wring a strong gale, with thick dirty weather and rais. In from the course we have been storing for the three provided days (5 E. by E.) we ought to have passed 25 to 30 calles to the him to exist for the three provided and the immorphism of the ship to be set to the Southward on math (30 miles) in the time, and we have never experienced an and 120 miles) in the time, and we have never experienced an and 120 miles) in the time, and we have never experienced an addition of these shades onto on the sharts and as I also have a story of these shades onto the next and as I also in the stip's p shi too was anown to be correct at the time the latents were seen."
